IVAO

REGULATION ON LANGUAGES
IN VIRTUAL RADIO-COMMUNICATIONS

1. The two languages that may be used in radio-communication in the airspaces of Russian Federation and the Republic of Kazakhstan are exclusively Russian and English. The choice of language is a privilege of the pilot.

2. Radio-communications in the airspace of the Republic of Belarus are to utilise the English language predominantly. Nevertheless, communication in Russian is allowed by mutual agreement of the pilot and the ATC Officer.

As not all IVAO clients support the cyrillic alphabet, text communication shall be carried out using latin letters.
